About Me

Passionate Software Engineering student currently pursuing a degree, with a strong foundation in programming, software development, and problem-solving.

Skilled in Java and for object-oriented and structured programming, with experience in building efficient, optimized solutions.

Proficient in Flutter and Dart for developing cross-platform mobile applications with clean UI and responsive design.

Experienced in JavaScript for creating dynamic and interactive web applications, focusing on logic building and front-end functionality.

Education

COMSATS University, Abbottabad

2022 – 2026

Bachelor of science in Computer Science (CGPA: 2.83 / 4.00)

Abbottabad, Pakistan

- **Relevant coursework:** Data Structures and Algorithms (Java), Object Oriented Programming, Web Development, Database Systems, Computer Networks, Computer Organization And Assembly Language, Mobile Application Development

Technical Skills

Languages: C, Java, JavaScript

Technologies: React.js, MySQL, Git

Experiences

Dynamic Leo

Dec 2024 – April 2025

Frontend Developer intern

Remote

HTML

- Structured and organized web pages using semantic HTML5 elements.
- Implemented forms, tables, multimedia (images, videos), and hyperlinks.
- Followed accessibility and SEO-friendly coding standards.

CSS

- Styled web pages using modern CSS3 features like Flexbox and Grid.
- Designed responsive layouts compatible with all screen sizes.
- Used transitions, animations, and pseudo-classes for interactive designs.
- Learned how to use frameworks like Bootstrap and Tailwind CSS for faster styling.

JavaScript

- Gained strong understanding of ES6+ concepts such as let/const, arrow functions, destructuring, and promises.
- Learned functions, arrays, objects, loops, and conditional statements for dynamic behavior.
- Implemented form validation, interactive UI elements, and data handling.

React.js

- Learned component-based architecture and built reusable UI components.
- Worked with JSX, props, and state management.
- Implemented React Hooks (useState, useEffect) for managing side effects and logic.

Projects

Semester Projects

2022 – 2025

Frontend and Backend Development

- **Java** | Developed a GUI-based Hostel Management System app to enhance Java programming skills.
 - **C** | Built a ATM System console based.
 - **Web Development** | Created a School Management System in React.js to explore its core concept
-
